Objective

I aspire to join a dynamic company where I can leverage my skills, acquire valuable experience, and actively contribute to its success by enhancing productivity, fostering innovation, and strengthening its reputation in the industry.

Work Experience

- Internship

IBM

22/10/2024 - 05/11/2024

During this internship, I worked on developing and training a data model using Python and the Pandas library. This involved data preprocessing, feature engineering, and model training to predict specific outcomes. I leveraged data analysis techniques to clean and structure the datasets, ensuring the model's accuracy and reliability in generating the desired predictions.
- Internship

IBM

25/06/2024 - 05/08/2024

Successfully completed an internship in Front-End Web Development, which involved the design and development of a comprehensive project showcasing expertise in HTML, CSS, JavaScript, and responsive design principles. Gained practical experience in building user-friendly interfaces, optimizing website performance, and adhering to industry best practices. Demonstrated strong problem-solving abilities, effective collaboration in a team setting, and the ability to deliver high-quality work within established deadlines.
